

Comp 306

Mobile Development

Lab 10

Name: _____

Due: 13 Dec 2018

This lab is all about animation and panResponder (gestures).

Reference: The class web site has references

1. Create a new project and get the `anim8.js` and `gest1.js` examples from the class website running.
 - a. Modify `anim8.js` by adding an image that also changes positions when the button is clicked. It should spring in the same manner as the button and box.
 - b. Modify `gest1.js` by adding a second shape and having it follow gestures at the same time as the circle that is already present.
 - c. Show your modifications to the instructor/TA and have them sign below.

Instructor/TA signature

2. Now create a new project and implement the following features.
 - a. Include two images in the app.
 - b. Track gestures on each image.
3. Show your app to the instructor/TA and have them sign this sheet. **You must turn in this sheet.**

Instructor/TA signature
