Mobile Development

Lab 1

Name: _____

Due: 27 Sept 2018

1. Create a new project and get the state2 example from class running.
2. Change the state2 example in the following ways:
 - a. Make the original text a prop that is passed in when the instance of the Home class is created. When you update the **myState** variable to the original text in the **else** statement, use a prop instead of a string.
 - b. Modify the exported class in the following ways:
 - i. it contains *three* instances of the Home class, each with different values for the text prop that you created in a.
 - ii. Each should also have a different color/size/background color.
 - iii. Use a stylesheet.

Instructor/TA signature

Submission: Name your App.js files for parts 2 as yourAccountName-2.js and submit them via Sakai. You must also turn in this sheet with a signature.
