

# Comp 306

## Mobile Development

### Lab 2

Due: 4 Oct 2018

1. Create a new project and get the list example from class running.
  - a. when it's running, draw a diagram on the back of this sheet that shows what happens when the app is loaded by the system.
  
2. Change the list example in the following ways:
  - a. Add two new variables to each data item (in addition to the key).
  
  - b. Change the app so that the three parts of each data item is displayed and each has a different background color, text color, and size.
